PROFILE

AI Engineer experienced in building Generative AI, NLP, and predictive analytics applications using Python, FastAPI, LangChain, and machine learning frameworks. Skilled in developing multi-agent systems, RAG pipelines, semantic search applications, and real-time monitoring solutions. Strong understanding of backend APIs, model evaluation, workflow automation, and end-to-end AI application development.

TECHNICAL SKILLS

Programming: Python

Generative AI & NLP: LLMs, RAG, LangChain, CrewAI, AI Agents, FAISS, ChromaDB, Semantic Search, Prompt Engineering

Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, NLP, Feature Engineering, Model Evaluation, Random Forest, ANN, CNN, RNN

Backend Development: FastAPI, Flask, Streamlit, REST APIs

Databases & Tools: SQLite, MySQL, Git, GitHub

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, EDA

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern — Placemantra

Jan 2025 – Mar 2025

- Developed machine learning and NLP pipelines involving preprocessing, feature engineering, model training, and evaluation.
- Built customer segmentation models using K-Means clustering and spam news classification systems achieving **95.8% accuracy**.
- Developed end-to-end workflows for data preprocessing, model evaluation, and result visualization.

PROJECTS

Multi-Agent AI Recruitment Automation Platform

Tools: CrewAI, LangChain, FastAPI, React.js, SQLite, FAISS

- Built a multi-agent recruitment platform to automate resume screening, ATS scoring, semantic candidate matching, and interview generation workflows using CrewAI and LangChain.
- Implemented RAG pipelines with FAISS vector embeddings for semantic resume search, skill extraction, and candidate-job matching using similarity-based retrieval techniques.
- Developed FastAPI backend services and React dashboards for recruiter workflow management, candidate tracking, and AI-driven hiring insights evaluation using cosine similarity and retrieval relevance metrics.

TriplIQ – AI Travel Booking System

Tools: FastAPI, React.js, MongoDB, LangGraph, MCP

- Developed an AI-based travel booking system for route planning, seat selection, and booking workflow automation.
- Built agent workflows to analyze 100+ travel options and recommend optimized routes based on budget and travel preferences.
- Designed automated booking workflows for travel planning and recommendation systems.

MotorIQ – Predictive Monitoring & Alert System

Tools: ESP32, FastAPI, Python, Random Forest, React.js

- Built a real-time motor monitoring system using temperature, vibration, and RPM sensor data streamed through ESP32 devices.
- Trained a Random Forest model for motor health classification into Normal, Warning, and Critical states.
- Achieved **92% classification accuracy** and implemented automated alert workflows for preventive maintenance.
- Developed live monitoring dashboards with real-time analytics and alert visualization.

EDUCATION

Ellenki College of Engineering and Technology - Affiliated to JNTUH

B.Tech in Electronics and Communication Engineering

Nov 2022 – May 2026

CGPA-8.62/10

Achievements & Certifications

- Recognized as Finalist in Consecutive Years** – TASK Code Unnati Innovation Marathon (SAP & Edunet, 2025 & 2026)
- Emerging Technologies Certification — SAP & Edunet Foundation, 2025.
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional.
- Foundation: Introduction to LangChain – LangChain Academy, 2026.
