PROFILE

AI Engineer specializing in Generative AI, RAG, LLMs, and multi-agent systems. Hands-on experience building end-to-end AI applications using Python, LangChain, FastAPI, vector databases, and LLM platforms. Skilled in semantic search, AI automation, and intelligent workflow orchestration, with experience delivering real-time enterprise AI solutions.

TECHNICAL SKILLS

Programming: Python

Generative AI & NLP: Generative AI, LLMs, RAG, AI Agents, Agentic AI, LangChain, LangGraph, CrewAI, Prompt Engineering, Semantic Search, Embeddings, FAISS, ChromaDB, pgvector, AI tools (Ollama, Gemini)

Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation, ANN, CNN, RNN, K-Means Clustering, Classification

Data Science & Analytics: Pandas, NumPy, EDA, Data Analysis, Data Visualization, Matplotlib, Seaborn, PowerBI

Backend & APIs: FastAPI, Flask, Streamlit, REST APIs, API Integration

Databases & Tools: PostgreSQL, MySQL, SQLite, Git, GitHub, Docker

AI Tools & Platforms: Ollama, Google Gemini, OpenAI, Claude, LLM APIs, Embedding Models

PROFESSIONAL EXPERIENCE

IT Intern — IKCON Digital IT Services Pvt Ltd, Hyderabad, India

Jun 2026 – Present

- Built and integrated RAG pipelines for enterprise knowledge retrieval, including document ingestion, chunking, embeddings, semantic search, and LLM-based contextual responses.
- Developed audio transcription analysis workflows to process meeting recordings and extract actionable insights such as action items, tasks, risks, and follow-ups from transcripts.
- Worked on AI-powered QA/testing agents and automation, leveraging LLMs and agentic workflows to support test-case generation, validation, issue identification, and real-time enterprise application testing.

Artificial Intelligence Intern — Placemantra

Jan 2025 – Mar 2025

- Developed machine learning and NLP pipelines involving preprocessing, feature engineering, model training, and evaluation.
- Built customer segmentation models using K-Means clustering and spam news classification systems achieving 95.8% accuracy.
- Developed end-to-end workflows for data preprocessing, model evaluation, and result visualization.

PROJECTS

RAG Cortex – AI-Powered Retrieval-Augmented Generation Platform *Tools: Python, LangChain, FastAPI, PostgreSQL/pgvector, Ollama, LLMs, Embedding Models, Docker*

- Built end-to-end RAG system for enterprise document Q&A, implementing document ingestion, semantic chunking, and embedding generation using Ollama language models.
- Integrated pgvector with PostgreSQL for efficient vector similarity search and retrieval of contextually relevant documents, reducing LLM hallucinations in generated responses.
- Developed modular FastAPI backend services with containerized Docker deployment for scalable production-ready AI application architecture.

Multi-Agent AI Recruitment Automation Platform *Tools: CrewAI, LangChain, FastAPI, React.js, SQLite, FAISS*

- Architected multi-agent system for automated resume screening, ATS scoring, and semantic candidate-job matching using CrewAI orchestration and LangChain pipelines.
- Implemented RAG-based semantic search with FAISS vector embeddings for skill extraction, candidate profiling, and relevance-based retrieval using cosine similarity metrics.
- Built FastAPI backend with React dashboards for recruiter workflows, candidate tracking, and AI-driven hiring insights.

TripIQ – Agentic AI Travel Booking System *Tools: FastAPI, React.js, MongoDB, LangGraph, MCP*

- Developed agentic workflow system for travel planning, route optimization, and booking automation using LangGraph agent orchestration and Model Context Protocol integration.
- Engineered agent-based evaluation system to analyze 100+ travel options and recommend optimized itineraries based on user budget and preferences.

EDUCATION

Ellenki College of Engineering and Technology - Affiliated to JNTUH

Nov 2022 – May 2026

B.Tech in Electronics and Communication Engineering

CGPA: 8.62/10

ACHIEVEMENTS & CERTIFICATIONS

- Recognized as Finalist in Consecutive Years – TASK Code Unnati Innovation Marathon (SAP & Edunet, 2025 & 2026)
- Emerging Technologies Certification — SAP & Edunet Foundation, 2025.
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional.
- Foundation: Introduction to LangChain – LangChain Academy, 2026..
